

AGRICULTURE

WE'RE READY TO MUCK IN WHENEVER YOU WANT US

We know how important it is to you to deliver the highest quality produce and we're ready to roll up our sleeves and help. We also know that our agriculture and horticulture customers have very specific requirements, so we work with you to deliver the best low carbon fuel solution for your enterprise.

Whether you're running a dairy farm, raising pigs or poultry, or growing farm fresh produce, Calor is a tailor-made fit for your business.

ABOUT CALOR

We are a leading distributor of Liquefied Petroleum Gas (LPG) and BioLPG in Ireland – delivering innovative energy solutions for over 80 years. Working closely with manufacturers of energy efficient technologies, we are at the forefront of energy development, providing you with the most up to date and effective solutions. Part of SHV Energy, the largest dedicated global LPG distributor in the market, we are the people to help your business grow.

THE SMART CHOICE FOR AGRICULTURE

Calor 100% renewable BioLPG and regular LPG are the fuel of choice for agricultural and horticultural enterprises. These are just some of the benefits they provide:

- No risk of tainted produce or spillage.
- Reduced CO2 emissions.
- Supply chain accountability – part of your Farm to Fork traceability commitment.
- Improved controllability.
- Fuel security - no risk of fuel theft.

LOWER CARBON, ENERGY-EFFICIENT SOLUTIONS

BioLPG

Only from Calor, BioLPG is 100% renewable. It reduces your business's carbon footprint, cutting greenhouse gas emissions by between 50% and 90%. Naturally, it's the first choice for enterprises who want to significantly reduce their environmental impact – to meet customers' or supply chain's demands.

- Made from sustainably sourced renewable and waste materials.
- Reduces carbon footprint.
- Reduces greenhouse gases by up to 90%*.
- Identical to regular LPG in use and performance.

LPG

LPG is one of the cleanest forms of energy, producing far lower carbon emissions than oil, coal, peat and even electricity. Delivered in cylinder or bulk tank form, it is a versatile fuel suitable for all types of enterprises.

- Cleaner burning fuel.
- Lower carbon energy.
- Versatile, portable and manageable.
- Easily stored in cylinder or bulk.

*BioLPG reduces GHG by at least 50% and up to 90% against set values of fossil fuels, in accordance with the Renewable Energy Directive. Actual figure is dependent upon input feedstocks.

DAIRY FARMS

We know from the dairy farmers we work with that producing the highest quality milk is a complex business. And a constant supply of hot water is vital to the process. Calor powered Rinnai instant water heaters are the low carbon solution busy milking parlours have been waiting for:

- Suitable for chlorine-free detergents.
- A-rated for energy efficiency.
- Reduces carbon footprint.
- Infinite supply of hot water on demand.
- Up to 85°C instantly.
- No standby hot water storage losses.
- Works with all types of dairy washing systems.
- Can improve TBC and reduce contamination risks.

POULTRY FARMS

As every poultry farmer will tell you getting the heating right directly affects the profitability of your poultry farm. And that's where Calor can help. Calor BioLPG or LPG powered heaters provide a consistent, controllable level of heat. Unlike oil or electricity, the heat produced contains just the right amount of moisture to encourage optimum feathering and weight gain. See the benefits for your poultry business:

- Moist heat promoting rapid, even feathering.
- Cleaner burning and efficient fuel.
- Reduces carbon footprint.
- Controllable, flexible heating solution.
- No risk of fuel spillages.
- Reliable and dependable fuel supply.

HORTICULTURE

Calor BioLPG or LPG powered heating systems are more than a cleaner and economical energy solution for horticultural businesses. They also provide frost protection and consistent temperatures, optimising CO₂ levels and reducing moisture. See how the benefits can maximise your flower growth and increase crop yields:

- No tainting of produce.
- Clean burning with virtually no soot.
- Optimises CO₂ levels.
- Reduces carbon footprint.
- Provides consistent temperatures.

PIG FARMING

When your business depends on the welfare of your animals having the correct heating system is essential to your success. Calor BioLPG and LPG powered heat pads and canopies are a clean, safe and secure solution to see your livestock through the early weeks from farrowing to weaning and beyond. It's just one of the many ways Calor's uniquely tailored fuel solutions can benefit your business:

- Clean, consistent, safe heat.
- Reduces carbon footprint.
- Versatile and manageable fuel.
- Reduced energy costs, less energy wastage.
- Available in bulk or cylinder.

CROP DRYING

Having brought your crops to the peak of perfection, the last thing you want is for them to spoil in post-harvest storage. Calor BioLPG and LPG provide a clean, reliable and effective fuel solution which creates ideal crop-drying temperatures that are easy to maintain – whatever type of crop you produce. See the benefits:

- Taint-free produce.
- Reduces carbon emissions.
- Clean, highly controllable fuel.
- Takes your crops from seed to market.
- Suitable for mobile and static grain dryers.

WE'RE MORE THAN JUST AN ENERGY PROVIDER

We're a team you can count on.

Our Calor Energy Advisors are highly skilled at putting together a complete, custom-made energy solution for your unique set of business requirements. In addition, he or she will recommend the appropriate appliances and systems, so that your business grows more energy-efficient and cost-efficient.

ON-SITE STORAGE OR CYLINDER SUPPLY?

What works for your business?

Many businesses find a bulk tank supply is the best option. This means Calor delivers directly to a specially installed tank (or number of tanks) on your premises. If you don't have space for a tank or only need a small supply, our cylinders – which come in a range of sizes – could be the answer.

Your Calor Energy Advisor will work with you to design the best solution for your operation, ensuring that you always have the capacity to meet your business's energy needs.

YOU'LL NEVER RUN OUT WITH CALOR GAS.

Our tanks come equipped with an automated telemetry system that constantly monitors your fuel level and automatically tells us when you need a top-up. You don't have to do a thing. And with a nationwide fleet of tankers on the road all year round, you can be sure that you'll never run out.

And, if you use cylinders, our switch over system ensures that you've always got plenty of time to order new ones.

TOTAL CONTROL OF YOUR BILLS WITH mycalorgas.com

Calor Gas is a very manageable fuel. So it's no surprise that, with our range of payment options, paying your bills is just as manageable. In fact, once our Energy Advisors understand your particular gas requirements, they will work out a payment solution that best suits your business.

You can also manage your Calor account directly at www.mycalorgas.com. Just complete a simple online registration and you're all set to:

- Check your business account details, whenever and wherever you want to.
- View and pay your company's Calor bills online.
- Place an order for gas delivery (if applicable).
- View and print all transactions, invoices and statements.
